"Insider Tips To Make Your Business Run Faster, Easier, And More Profitably"
Since 1984

Is it Really November?

Farewell Halloween and welcome Thanksgiving. That happened very quickly. This year has gone by very quickly.

The days are getting shorter and deadlines are creeping up with the end of the calendar year, but our lists of things to do grows longer.

Do you have an item on your list about technology, cyber security, or even VoIP phones? These topics are less than enjoyable to address, but our team makes the process simple and easy. Let us help you check off one of these items on your to do list!

November 2022

"As a business owner, you don't have time to waste on technical and operational issues. That's where we shine! Call us and put an end to your IT problems finally and forever!"

Do I Need To Upgrade My Network? 4 Amazing Benefits You'll Experience

A business owner has many responsibilities within their business. They can be so busy that sometimes things are overlooked for an extended period of time. For example, many business owners may forget to upgrade their network infrastructure. In actuality, upgrading your network is extremely important - and it is one of the smartest things you can do as a business owner.

Technology has rapidly advanced over the past few years, and network traffic continues to grow. If you're still using the same network from even five years ago, you've probably noticed your network speed has decreased dramatically. In fact, old networks struggle to keep up with all of the advancements and traffic growth. They can even open your business up to a cyber-attack.

Your network infrastructure should be upgraded every few years for many reasons. If your business has grown

consistently over the last few years and your current network can't keep up with your business needs, it may be time to upgrade. If you're continually running into issues with your current network, an upgrade will help. Some industries may even be legally obligated to upgrade their network in order to keep their customer or client information secure.

Upgrading your network comes with an abundance of benefits. Here are four of the best for any business.

Better Network Security

Cybercriminals are much more cunning than we often give them credit for. They continue to develop new cyberthreats and ways to attack various networks. If you haven't upgraded in some time, you are opening your business up to a cyberbreach. New networks come with a plethora of added security benefits that aren't possible with the old and outdated ones. You want to make it as

Continued from pg.1

difficult as possible for a cybercriminal to hack into your system and steal valuable information – and one of the best ways to stop a cybercriminal in their tracks is by upgrading your network. One cyberbreach can be incredibly detrimental to your business, so don't take that risk.

Faster Internet Speeds

Think about how much more productive your business would be if you had faster Internet speeds. Your employees can get more done without having to deal with lag from poor Internet services. Older networks can't keep up with the demands of modern technology. With an older network, you will see slower Internet speeds that won't allow your employees to utilize cloud storage systems and business applications at high speeds. Even your customers will notice improvements in the speed of your network if you use client-facing applications in your business. Everyone wins when you have faster Internet speeds.

New And Better Hardware

One of the best parts of upgrading your network is that you'll receive new, more reliable hardware than what you've had in the past. You'll gain access to more computing power and larger storage space. More than

anything else, your new hardware will be dependable, and you won't have to worry about it failing on you.

Improved Compatibility

Remember how we said earlier that technology has advanced rapidly? It's true – and there are new advancements made every day. Without an upgraded and updated network, you may be unable to use many applications and technologies that could improve your business. An upgraded network will allow you to connect with any apps you think will benefit your business. You can explore new tools without worrying about crashing your network. You'll also gain more freedom in choosing your new tech investments as you would be more limited when using outdated technology.

Upgrading your network is the best way to keep up with the ever-changing landscape of the digital world. If you haven't upgraded your network in a while, now is the best time to do so. Plenty of benefits come with it, so don't wait until you have to make a change. Be proactive!

“Upgrading your network is the best way to keep up with the ever-changing landscape of the digital world.”

'I DIDN'T KNOW'

Unfortunately, That Excuse Doesn't Replenish Your Bank Account, Resolve A Data Breach Or Erase Any Fines And Lawsuits.

It's coming ...

- That day a hacker steals critical data, rendering your office useless
- That day when your bank account or credit card is compromised
- Or that day when your customers' private lives are uprooted

Cybercriminals and hackers are constantly inventing NEW ways to infiltrate your company, steal your assets and disrupt your life. The ONLY way to STOP THEM is this:

You Must Constantly Educate Yourself On How To Protect What's Yours!

Now, for a limited time, we have the perfect way to help reduce your risk and keep you safe! Simply sign up to receive our FREE "Cyber Security Tip of the Week." We'll send these byte-size quick-read tips to your e-mail inbox. Every tip is packed with a unique and up-to-date real-world solution that keeps you one step ahead of the bad guys. And because so few people know about these security secrets, every week you'll learn something new!

Shiny New Gadget Of The Month:

Meeting Owl Pro

A common concern across hybrid workplaces in various industries revolves around the ability to host efficient meetings with all team members. Thankfully, Meeting Owl Pro is here to help. This device is an all-in-one, 360-degree camera, microphone and speaker designed for hybrid teams. It has a camera that can capture an entire conference room of people while giving remote workers individual views of each person in the meeting – just like what you would see on Zoom. It has eight smart microphones that can pick up sounds and attribute them to the person speaking and three speakers that also allow remote workers to be heard. It's easy to set up and is compatible with nearly every video-meeting platform, so don't wait. Give Meeting Owl Pro a try today.

Get Hired For Your Dream Job By Closing With These 3 Things

Over 20 years ago, I taught as a volunteer business finance teacher at a low-income/high-crime high school. A junior at that school approached me for mentorship, so my firm bought this aspirational leader a *Wall Street Journal* subscription and requested that he read it every day. We also invited him to check back with us every six months if he wanted more career advice to become a successful business leader.

This student continued to work hard and earned a scholarship to a highly respected college. After graduating, he worked long hours for two different investment banks and even served a successful stint as a COO of a public company. Recently, he reached out to me and asked, "Geoff, a headhunter says I'm 1 of 2 [finalists for my first CEO job], with a decision to be made shortly. Any thoughts on how to close the deal, or should I let it close itself?"

I was excited for my mentee as this was a great opportunity. I didn't have to ponder his question long to come up with an answer. I told him, "You close it! Here's how. You reflect your understanding of their goals and wishes, tell them you are fully excited, tell them you look forward to working closely with them, seek their counsel and keep them fully apprised of what's happening in the business and your intentions."

Hiring managers and boards want to know their potential candidate is crystal clear about their expectations and long-term goals. By stating your understanding of their specific goals, you're showing you're on the same page as them. Boards don't feel comfortable when they feel that CEOs want to take the company in a direction that does not match their wishes.

You tell the board you are fully excited because sharing enthusiasm and unbridled excitement for the mission is not something your competitors will do. They'll view it as a sign of vulnerability when, in reality, it's a sign of confidence. Sharing your love for the opportunity is never a bad idea.

And you tell the board you're looking forward to working closely with them because one of their greatest fears is that a new CEO will leave them in the dark. Boards want to know what is happening in the business and what the CEO plans to do to reach their goals. When you inform your new bosses you plan to be communicative, you're reassuring them you will keep them in the know.

Never leave the close to chance. Following this advice will lead to a better chance of landing the dream job you recently interviewed for.

■ 3 Ways To Stay Resilient During These Uncertain Times

Over the last few years, we have seen plenty of uncertainty. The pandemic, politics, wars overseas, inflation and a looming recession have done nothing but make these uncertain feelings grow. It's left many business owners wondering how they can stay resilient. Here are three ways to stay resilient during these uncertain times.

Embracing Change

In order for your business to see success, you must embrace change and work with it. It doesn't matter if

the changes are coming from inside or outside of your business – if you're well-prepared to embrace them and adapt, you will continue to see success.

Empowering Your Team

Your team should be able to make changes without waiting for approval. As the business owner, you must clearly communicate goals so your team can make decisions the same way you would.

Finding A Mentor

You will not face a situation in your business that is completely new. Someone somewhere has already faced the same obstacles and found a way

to overcome them. Find a mentor with vast experience who can offer advice and guidance when you're unsure about what to do next.

■ Learning Any Skill Faster With The 85% Rule

Everyone wants to learn new skills as quickly as possible, but each individual has different learning strategies. Some people try to push themselves out of their comfort zone, which a Yale study confirmed does work – but pushing yourself too far can have adverse consequences. Instead, we should try to find our sweet spot.

"My computer crashed...to the ground when I got frustrated and threw it out the window."

A recent study conducted by the University of Arizona found that we maximize our learning efficiency when we fail 15% of the time. This means that we learn at our best when we're succeeding at a given task 85% of the time. It's okay to fail sometimes, and failing 15% of the time may even be the best way to learn.
